### Black Rabbit Books

**Bolt Books** address the trend within schools toward helping students analyze content rather than simply memorize it. With almost 50 percent of every book filled with infographic content, these Hi/Lo books present material in a 100 percent different way from any material in the marketplace. These books are a powerful tool that hits three main learning areas: visual literacy, content mastery, and critical thinking skills. They reflect student interests, and they offer the infographic, data-driven content that students now see around them.

Bolt subjects are guaranteed to tantalize: sports, the paranormal, popular biographies, nature, science, technology, and cool animals. Students will self-select and share these books as they participate in the social value that grows out of successful literacy building. For the librarian, Bolt promises strong circulation and reading success stories.

**Bolt Books** support every kind of reader, whether they're casual, reluctant, or obsessive-compulsive data miners. Described differently, these are fun books!
